

Table 1: Performance of the original EEGNet across four motor imagery datasets. BCICIV2A and BCICIV2B are primary results (300 epochs); IIIa and Physionet_MI are quick 100-epoch baselines with a single seed, reported only as supplementary evidence.

Dataset	Classes	Val Acc (%)	Test Acc (%)	Test Kappa
BCICIV2A	4	79.17	–	–
BCICIV2B	2	77.72	78.35	0.5669
IIIa	4	55.95	–	–
Physionet_MI (22ch)	4	49.30	–	–

Note: BCICIV2A and BCICIV2B are primary results (300 epochs). IIIa and Physionet_MI are quick 100-epoch baselines with a single seed and are reported only as supplementary evidence of implementation generality. “–” indicates unavailable test metrics.
